Overview

Dear All

Wish you all a very happy and prosperous New Year.

30 years in this business and progressive changes in our operational style to adapt to the current conditions, makes us look forward with confidence to sustain in this challenging market. To add to our repertoire of services, we are now the sole dealers of TAFE Power gensets, TAFE's 60-years rich legacy combined with its expertise in manufacturing diesel engines, drives the TAFE POWER brand of Diesel Generators and Engines for Asia, Africa, Europe, Australia and the Americas. TAFE has been one of the pioneers in manufacturing diesel engines and are known for quality, technology and reliability, with low operational expenses, high fuel efficiency and higher value offering at an affordable price

We believe that Azaiba United can be the pivotal partner in an effort to craft a responsive, collective and inclusive solution for a quality and cost effective alternative to your service needs in 2024 also.

Azaiba United looks forward to building new strategies, finding economic solutions for your service needs and keeping your equipment repair and maintenance cost within affordable and acceptable limits in these trying times. Our collaboration with like minded corporates like TAFE will now give you the flexibility to choose from more economical power options, yet assuring you of our well known and experienced "out of the way" service and back up support.

The continued support from all our customers, the willingness of our work force and the grace of God, are all what we truly acknowledge and are grateful for. We look forward to continue our services in the same spirit, year after year.

It is during such trying times that we see our principles of integrity, honesty and dedication to services, inspire confidence in our customers to rely on us to meet their service requirements.

Azaiba United Company is one of the leading names in the heavy equipment industry, time tested and work proven. The result of working relentlessly with innovative ideas and unrivalled services, gives the most reliable products of uncompromising quality that performs to the highest standards. Established in 1993, we have evolved into a Heavy Equipment Techno Zone dealing in the repairing and refurbishment of construction equipment, power generators, cranes, air compressors and oil field equipment.

The 11,000 sq.mtrs area in Misfa, near Oman Cement, will now have our TAFE sales and service centre also, in addition to our

- Service division for heavy equipment repairs/refurbishment
- Engineering division for machining and fabrication works
- Parts division for replacement CAT parts and other popular brands
- Rental division for hire of generators, air compressors, welding sets, light towers and related accessories
- Fuel Injection Pump unit where repairs and calibration is undertaken
- Electrical rewinding centre for motors and generators
- Radiator repair and service centre
- Load test and calibration centre for power generators
- Balancing centre for rotating components up to 7 tons

The cultivation of a smart team of enterprising and energetic individuals to handle the key divisions of the company namely, engineering, service, parts and rental, along with business development and customer relations, enable us to cater to our customer needs more efficiently and to the satisfaction of the clients. The business development and customer relations team work on behalf and benefit of the client, bringing out more productivity from the technical team.

We reduce the total cost of ownership of your equipment by repairing and not replacing parts or components unless genuinely required, assist you in making decisions on equipment repairs and ownership to suit your operational requirements and enhance your productivity.

Internally, we are constantly evolving to handle the changing needs of the market. We are dedicated to exceeding your expectations at every stage of the work we carry out on your equipment and ensure quality work and assure you a reliable rebuilt service life for your equipment.

Once again, at Azaiba United, confidence is the driving force of our operations and the way we do business. We work with dedication and teamwork, building new opportunities through relentless commitment to quality and reliability.

We make sure your equipment and engines work when they are needed the most ON THE JOB.

We look forward to be of service to you

Thank you.

TAFE POWER

On the occasion of its Diamond Jubilee year, TAFE launches a new indomitable product range for the international markets and presents with pride, another benchmark brand - TAFE POWER.

TAFE's 60-years rich legacy combined with its expertise in manufacturing diesel engines for the Indian subcontinent, drives this newly launched TAFE POWER brand of Diesel Generators and Engines to countries in Asia, Africa, Europe, Australia and the Americas. TAFE, through its subsidiary TAFE Motors and Tractors Limited (TMTL), has been one of the pioneers in manufacturing diesel engines in India. TMTL Engines has its origin in European engineering and technology, and are currently being used as a prime mover for various applications such as tractors, power generation, construction equipment, agriculture equipment, marine applications and various pumping applications including firefighting, dewatering pumps etc.

TAFE, through TMTL, has technical collaboration with global players such as Ricardo Consulting (UK), AVL (Austria), Sisu Diesel and Valtra (Finland). TAFE POWER Diesel Generators have low operational expenses, high fuel efficiency and offer value for money.

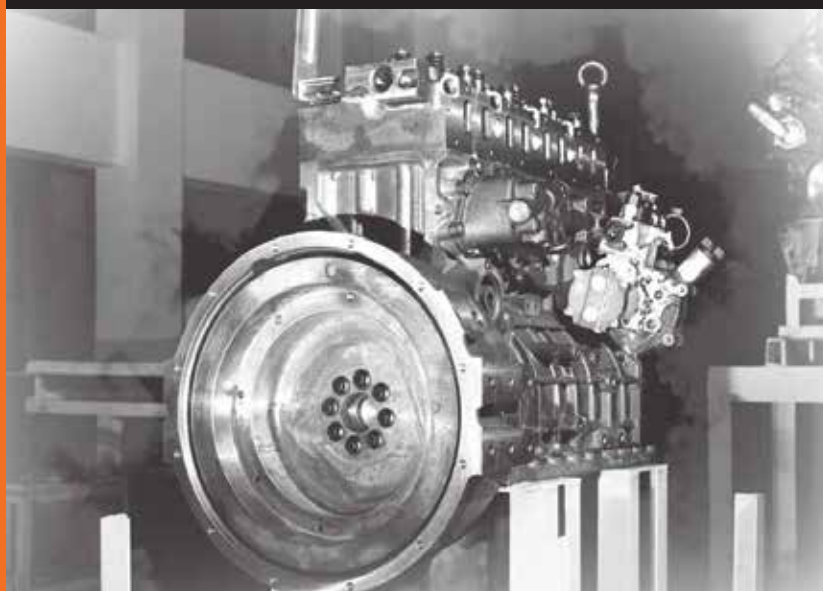

HIGHLIGHTS

- Over 1 Million Satisfied Customers
- Fixed & Variable Speed Engines
- International Technology
- Ultra Long Engine Life
- High Fuel Efficiency
- Low Cost of Ownership
- Robust Build Quality
- High Block Load Taking Capability
- Easy to Maintain
- Long Service Interval & Overhaul Duration
- Safe & Reliable
- Best-in-class Service Support
- Strong In-house Application Development

WHY TAFE POWER?

- TAFE's manufacturing might and rich engineering expertise spanning over 60 years
- International product quality - Safe and highly customizable
- Strong base of over 1 Million satisfied users
- Deep understanding of Engines and Diesel Generators business
- Market leader in India, dominant player in the telecom industry
- Strong experience in building and managing global networks and alliances in over 100 countries
- Operating on principles of TQM, TPM, SGA, Kaizen to meet global standards of quality and productivity
- Best-in-class service and after-sales support

Parts Division

We are a leading supplier of spare parts for a wide range of Earth Moving Equipment and Diesel Engines.

The **“One Stop Shop”** for Engine and Equipment parts of different brands.

- We are the sole distributors of IPD (Industrial Parts Depot), a prominent U.S manufacturer for Industrial Engines, mainly Caterpillar, Cummins and Detroit Engines for last two decades, in Sultanate of Oman.
- We represent TVH, a major supplier of spare parts for material handling equipment like Forklifts, Tractors & Tele-handlers
- We have a strong team to identify and define the requirement of parts.
- Our aim is to provide better life with quality parts. (Savings without Risk!)

Engineering Division

Engine Section

Our engine section team is highly experienced & qualified to do all kinds of engine component machining works: single/two/three/four/six/eight cylinder etc. Our technicians are always up to date on the latest industry trends and technologies and they are committed to providing our customers with best possible services. Our engine section is equipped to do high precision jobs using crankshaft grinding machine, vertical boring machine, line boring machine, honing machine, surface grinding machine, automatic seat cutting machine and connecting rod boring machine. We also undertake hydraulic pressure testing.

Machining Section

Our machining section is equipped with high precision conventional lathe machines of various sizes, milling machine, slotting machine and radial drilling machine. Our team of turners and machinists are technically qualified & experienced. We do manufacturing & repair of all kind of precision components. Our portable line boring machine facilitates in situ service to our clients.

Fabrication Section

Our fabrication section team consists of highly skilled and qualified fabricators and welders. We fabricate & repair all kinds of heavy earthmoving equipment components like bucket, boom and arm, to name a few. Also, we fabricate breaker mounting brackets. We also manufacture acoustic enclosures for generators.

Automotive Division

At Azaiba Automotive, we take pride in our unwavering commitment to delivering excellence in vehicle modification services, specifically to meet the criteria of PDO specifications, modified configurations of multi-utility vehicles of various authorities, as well as the personal taste of individuals who desire unique modifications on their personal vehicles. With years of expertise in the field, we have become the trusted partner of choice for numerous clients in the industry.

Our Dedication to Excellence: Azaiba Automotive has a team of skilled engineers and technicians, who possess deep knowledge and hands-on experience in modifying vehicles to excel in their area of operations. We understand the unique requirements and specifications of each sector, ensuring that every modification we undertake is precise and effective.

Custom Solutions: We recognize that no two projects are the same. That's why we offer fully customized vehicle modification solutions. Whether you need enhanced off-road capabilities, improved payload capacity, or specialized equipment installations,

we can design and execute modifications that align with your project's objectives.

Quality Assurance: Quality is our top priority. Every modification we carry out adheres to the highest industry standards, using premium materials and proven technology.

Compliance and Safety: Safety is non-negotiable. We ensure that all modifications comply with industry safety regulations and guidelines. Our commitment to safety extends to our workforce, with continuous training and adherence to safety protocols.

Timely Delivery: We understand the significance of time. Our streamlined processes and efficient project management guarantee that your modified vehicles are delivered on time, enabling you to stay on schedule and meet project deadlines.

Customer-Centric Approach: Our client relationships are built on trust and open communication. We work closely with you to understand your project's unique needs, budget constraints, and timelines, ensuring that our modifications align perfectly with your requirements.

At Azaiba Automotive, we are not just in the business of vehicle modification; we are in the business of enhancing your operational efficiency and contributing to the success of your project and requirement. Choose us as your partner, and experience the difference that expertise, customization, and unwavering dedication to quality can make in your projects.

Service Division

We at Azaiba United specialise in troubleshooting, overhauling and refurbishment of earth moving equipment, stationary equipment like generators, welding machines, hydraulic pumps and rig machinery. We have dedicated teams for repair and maintenance of engines, transmission, undercarriage, hydraulic cylinders, fuel pumps, electrical repairs, radiator repairs, rewinding of motors and main alternators.

Engine Rebuilding: We have a strong engine rebuilding team who are capable of carrying out overhauling of engines from single cylinder to 16 cylinders of various brands like CAT, Perkins, Detroit, Iveco, Deutz, Mercedes Benz, MAN, to name a few. One of our main attractions is our inhouse machine shop. We are able to reduce the turnaround time for the repairs with the support of the machine shop and our experienced technical team. We are also the authorised dealers of IPD in Oman, which is one of the premium aftermarket CATERPILLAR engine parts suppliers. This enables us to cater to our customers in the most cost-efficient way also meeting the OEM standards.

FIP Division: Our FIP division can handle overhauling and calibration of multi brand fuel injection pumps and fuel injectors to cater to our customers. We use the highest quality spare parts and materials.

Winding Division: Our winding division is capable of servicing and rewinding of motors of upto 220 kw and generators upto 1500 kva. We use H class insulated windings and high-quality consumables which provide maximum insulation and life to the job. We can carry out dynamic balancing of rotors upto 4 tons. Standard reports are provided with the repair jobs.

Electrical Division: Our electrical team is very capable to troubleshoot, repair and testing of your equipment. We have load banks to test generators upto 1000 kva. Our electrical team carries out conversion of obsolete control panels into customer friendly new generation control panels at economical rates. We very frequently undertake conversion of engines running on 50Hz to 60Hz

General bay (heavy equipment major repair & service): Our team in general bay is well experienced and can carry out the general repairs and repairs of transmission, hydraulic pumps, hydraulic cylinders and undercarriage. We can carry out the complete refurbishment of earth moving equipment starting from stripping down the equipment to bare chassis, repair and refitting and painting of the equipment as per OEM standards.

We are committed to provide the highest quality repairs and services to our clients. We can offer different packages according to the client requirements. We provide warranty on all our repairs, the period varying on the services provided. We also provide emergency repair and troubleshoot services to our clients, at site.

Rental Division

Azaiba Heights International rental solutions serve multiple industries, companies and events across Oman.

Our Rental Division has a range of Power Generators, Air Compressors, Welding Sets, Light Towers and Dewatering Pumps, that comply with PDO standards. We have a wide range of equipment for all construction, oilfield & contracting companies. As our range has different capacities and specifications of machines, we can provide for requirements of both heavier and milder nature.

DIESEL POWER GENERATOR

We supply a wide range of generators on rent from 20 KVA to 1500 KVA at competitive rates. Be it for short or long duration, we offer rental power solutions at best economic prices in the market.

AIR COMPRESSOR

We believe in making sure that you get safe air compressors to use with the rest of your project equipment. Our portable air compressors are also designed with environmental conservation in mind. The air compressors in our catalog are friendly to the environment and will be a perfect addition to your industrial project. Our experts will also help you through the planning and installation process anywhere in Oman.

LIGHT TOWER

Whatever industrial light solution you are looking for, we have a number of light solutions from top trusted brands in the industry. Our portable light tower can be powered through a variety of ways including diesel generators. The heavy-duty lights are designed to effectively illuminate working spaces for building sites, airports, road works, ports and even outdoor events.

WELDING MACHINE

No matter where you are in Oman, we have a portable rental welding machine with excellent safety controls that can serve you in your welding operation. A welding machine that does not meet industry standards can be a dangerous piece of equipment. It could potentially ruin your whole project or even cause you or your worker's, incredible harm. The welding machines in our company are from the top brands that are trusted for their quality products. These machines provide high performance as well as unmatched safety controls.

DEWATERING PUMP

We provide Dewatering Equipment for hire along with the associated pumps, thereby giving our clients full control over the equipment's functionality, if so, the client requires. Our pumps come along with the necessary HDP (High Density Polyethylene) pipe. We work with the clients to understand and advise on the nature of pump required for the specific task. Once the pumps are deployed, our clients can operate them continuously until dehire.
